

ACTA PHYSICA HUNGARICA

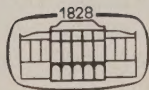

EDITORIAL BOARD

Z. BAY, N. KÜRTI, K. NAGY, L. PÁL, A. SZALAY,
I. TARJÁN, B. TELEGDI, L. TISZA, E. WIGNER

EDITOR OF THIS VOLUME

R. GÁSPÁR

VOLUME 55

AKADÉMIAI KIADÓ, BUDAPEST
1984

CONTENTS

Volume 55

Prof. I. Kovács' 70th birthday. <i>G. Herzberg</i>	5
CLASSICAL AND APPLIED PHYSICS	
Shape-preserving time-dependences in heat conduction. <i>H. Farkas and I. Mudri</i>	267
ELEMENTARY PARTICLES AND FIELDS	
Electroweak corrections for $\Sigma \rightarrow ne\nu$. <i>K. Tóth, T. Margaritisz and K. Szegő</i>	481
NUCLEAR PHYSICS	
Feasibility of a ^3He magnetometer for neutron electric dipole moment experiments. <i>Norman F. Ramsey</i>	117
Pre-equilibrium effect in $(n, \chi n)$ reactions. <i>M. L. Jhingan, R. P. Anand, S. K. Gupta and M. K. Mehta</i>	195
Removal cross sections for 14.8 MeV neutrons. <i>A. Boufraquech, G. Pető and J. Csikai</i>	303
Simple models for almost central asymmetric heavy-ion collisions at moderate energies. <i>L. P. Csernai and G. Fáti</i>	489
ATOMIC AND MOLECULAR PHYSICS	
Электронная спектроскопия в фундаментальных и прикладных исследованиях. <i>Д. Берени</i> ..	7
Rotational intensities in doublet transitions of a diatomic molecule. <i>T. K. Balasubramanian, A. S. P. Rao, R. D'Souza and N. A. Narasimham</i>	27
The structure of tricarbon oxide sulfide, $\text{O}=\text{C}=\text{C}=\text{C}=\text{S}$, as a function of the vibrational quantum number v_7 , determined by the isotopic substitution method. <i>Manfred Winnewisser and E. Walter Peau</i>	33
Pseudopotential and valence exchange in the multiple scattering method. <i>R. Gáspár and Á. Nagy</i> ..	45
Dipole correlation functions and intermolecular torques in nematic phase of EBBA and PAA. <i>P. Simova, N. Kirov, I. Dozov and M. P. Fontana</i>	63
Rotational analysis of the 3A system of $^{12}\text{C}^{16}\text{O}$ molecule. <i>T. Rytel and M. Rytel</i>	69
Angström system of the $^{13}\text{C}^{18}\text{O}$ molecule. <i>Z. Malak, M. Rytel, J. D. Janjić and D. S. Pešić</i>	85
Vibrational angular momentum in the theory of vibration-rotation spectra. Part I. <i>L. Nemes</i> ...	97
Evidence for the A_1 and A_2 components of $v_4 + v_5$ in the infrared spectrum of methyl bromide. <i>C. di Lauro and B. Velino</i>	127
Symmetry properties and the calculation of the rotation-internal rotation-inversion energy levels in methylamine. <i>L. Sztraka</i>	135
Vibrational and rotational constants for the $A^2\Sigma^+$ state of the $^{15}\text{N}^{16}\text{O}$ molecule. <i>J. Danielak</i> ..	161
Angström system of the $^{14}\text{C}^{16}\text{O}$ molecule. <i>J. Domin, U. Domin, Z. Malak and M. Rytel</i>	165
Pulsed polarographic studies of photosynthetic oxygen evolution. <i>P. Maróti, G. Laczkó and L. Szalay</i>	175
Mössbauer and EPR studies on iron-dihydroxybenzoic acid and iron-itoic acid chelate complexes. <i>Cs. Bagyinka, L. I. Horváth and L. Keszthelyi</i>	185
Spectroscopic study of diffuse light scattering media I. <i>Gy. Major</i>	213

The $a^3\Sigma_g^+ - c^3\Pi_u$ and $c^3\Pi_u - a^3\Sigma_g^+$ systems in the infrared spectrum of H_2 and D_2 . <i>I. Dabrowski and G. Herzberg</i>	219
Comparison of short-pulse generation methods of N_2 laser pumped dye lasers. <i>Zs. Bor, B. Rácz, I. Ketskeméty and L. Kozma</i>	229
A comparative survey of the evaluation of optical constants of weakly absorbing thin layers. <i>L. Michailovits, I. Hevesi, M. I. Török, T. Szörényi and Á. Süli</i>	241
Multiple wavelength differential absorption lidar evaluation. <i>T. I. Tarnóczy and P. Richter</i>	253
Forbidden rotational and vibrational-rotational transitions in H_3^+ . <i>M. R. Aliev and V. M. Mikhailov</i>	293
Temperature dependence of microcrystalline sodium uranyl-tris-acetate fluorescence spectra. <i>J. Szóke</i>	339
Application of the many-body perturbation theory based on localized orbitals to cyclic polyenes. <i>E. Kapuy, Z. Csépes and J. Pipek</i>	365
The influence of symmetry on SCF convergence. <i>C. Kozmutza and Zs. Ozoróczy</i>	375
Current state of research into the radiative characteristics of diatomic molecules. <i>L. A. Kuznetsova, N. E. Kuz'menko and Yu. Ya. Kuzyakov</i>	395
Gas temperature measurements in non-equilibrium plasma from the intensities of H_2 molecular bands. <i>B. P. Lavrov and M. V. Tyutchev</i>	411
Raman amplification spectroscopy. <i>A. Grofcsik and M. Kubinyi</i>	451
Electronic spectrum of GdO. <i>Yu. N. Dmitriev, L. A. Kaledin, E. A. Shenyavskaya and L. V. Gurvich</i>	467

FLUIDS, PLASMAS AND ELECTRIC DISCHARGES

Исследование оптического разряда вблизи поверхности пятиоксида ванадия. <i>Л. Нанаи, Й. Ковач, Э. Сил, К. Бали, И. Хевеши и И. Кечкемети</i>	247
Scattering and pulse narrowing in laser spark. <i>J. S. Bakos, I. B. Földes, P. N. Ignácz and Zs. Sörlei</i>	311

CONDENSED MATTER

Diameter controlled Czochralski growth of bismuth germanate single crystals. <i>G. Gévay and R. Voszka</i>	105
Effective mass model for anomalous magnetoresistance. <i>I. Kirschner, Gy. Kovács and T. Porjesz</i>	111
Irreversible thermodynamics of nematic liquid crystals. <i>J. Verhás</i>	275
Nonstoichiometry as a source of "intrinsic impurities" in $LiNbO_3$ crystals. <i>I. Földvári, K. Polgár and A. Mecseki</i>	321
Model calculations on the photokinetics of Mg_i centre formation in NaCl single crystals. <i>K. Raksányi and A. Watterich</i>	329
Infrared spectrum of hydrogen in the condensed phase. <i>K. Narahari Rao, J. R. Gaines, T. K. Balasubramanian and Romola D'Cunha</i>	383

CROSS-DISCIPLINARY PHYSICS

Role of physicists in the improvement of telecurie therapy in Hungary. <i>L. Bozóky</i>	17
Positron annihilation: A tool in interdisciplinary investigations. <i>D. Kiss, Zs. Kajcsos and L. Marczis</i>	51
Mathematical description of heat power engineering behaviour of glass in the building industry. <i>G. Ring and I. Csete</i>	443

GEOPHYSICS

Possibility of a thermal catastrophe in the earliest period of the earth as revealed by the volatile content of igneous crustal and mantle rocks. <i>A. Szalay</i>	427
